

Adriano Oda graduated in Neurobiology *cum laude* at the University of Pavia. For his degree dissertation, he attended Prof. Perin and Prof. Pizzala labs, where he implemented a primary culture of glia enriched with microglia. This study is part of the multidisciplinary approach to the characterization of microglial responses in neuroinflammatory conditions. He is author of 4 publications on scientific journals; since 2007, he has been training as a choir tenor with the association Ghislierimusica.
