

Associate Professor of Plant Pathology at the Department of Earth and Environmental Sciences of the University of Pavia

Her research activity is carried out in many branches of Mycology (aeromycology, fungal ecology, fungal taxonomy, applied mycology and plant pathology) focusing on the interactions of fungi with the environment and with the organisms they share it with.

She published 170 papers, among these 40 are peer-reviewed; moreover she has participated as invited speaker to many national and international congresses.

From 2003 to 2015 she is the Coordinator of the Ph.D. Program in Experimental Ecology and Geobotany (Pavia University).

Since January 2016 she is the Coordinator of the PhD Program in Earth and Environmental Sciences.
