

Postdoctoral researcher at the Plant Molecular biology Lab, Department of Biology and Biotechnologies, University of Pavia, Italy

He is currently working as Postdoctoral researcher in the Plant Molecular Biology Laboratory, where he performs biochemical and biomolecular analyses, in particular on recombinant enzymes produced in tobacco plants, and on the optimization of these enzymes in the processes of saccharification of agricultural biomasses. In 2014 he became PhD in Genetic and Biomolecular Sciences, with a thesis regarding DNA repair genes in *M. truncatula*. Graduated *cum laude* in Experimental and Applied Biology, qualified for the practice of Biologist profession.
