

Matteo Locatelli

Graduated in Building Engineering and Architecture at the University of Pavia in 2012, and now PhD Students at DICAr, University of Pavia. He worked in some architectural studios and collaborated with the STEP laboratory of University of Pavia to design 7 tactile maps for blind people for the main building of the University of Pavia. He had a scholarship to map the accessibility of all the building of the University of Pavia and to create a guide for disable people and students. He designed, with prof. A. Greco, and realized a lifting platform in the student's accommodation "Collegio Cairoli" in Pavia. He participated as tutor in several international workshop about accessibility as Winter School with ThyssenKrupp Encasa (2012), ABC - Accessibility and Building Conservation (2014, Project Winner), I_AM_Duomo (2015, Project Winner). From 2012 he is professor assistant in several teachings, as Technical Architecture 2 and Architectural Composition 2.
