

Roberto Pizzala is Associate Professor and co-head of the General Pathology Labs in the Department of Molecular Medicine of the University of Pavia. He teaches General Pathology in the Pharmacy and CTF courses and in the Graduate Schools of Biochemistry and Clinica Pathology, Medical Oncology and Preventive and Community Medicine. He received his Ph.D in Experimental Pathology. He obtained grants from national (PRIN, AMT) and international agencies (FP5, FP7). His main interests regard the involvement of redox state imbalance in pathological conditions, and in particular the modulation of cerebral damage in neuroinflammatory conditions. His technical skills include chromatography (HPLC-GC/MS), immunohistochemistry, cell cultures, photobiology and ICT in medicine. He is author of 37 full papers on scientific journals and 40 presentations at conferences; he is part of the reviewer panel for several international scientific journals. He is member of SIMT (Società Italiana di Medicina Traslazionale).
