Tax Code: BGLGPP54B19D925I

- Born on 19th of February, 1954
- Graduated in Biological Sciences, Pavia (1981)
- Ph.D. in Environmental Science, Rome (1988)
- Researcher at the Department of Animal Biology, University of Pavia (1990-2001)
- Research Professor of Ethology, University of Pavia (1995-2001)
- Lecturer of Ecology, Polytechnic of Milan (1997-1999)
- Associate Professor of Zoology, University of Pavia (since 2001)
- Director of the Master in Management and Conservation of Natural Resources, University of Pavia (2002-2003)
- Chairman of Bachelor and Msc curricula on Natural Sciences and Technologies, University of Pavia (2010-2013)
- Member of the Department of Animal Biology, University of Pavia (1990-2011).
- Member of the Department of Earth and Environmental Sciences, University of Pavia (since November 2011).
- Deputy Director of the Department of Earth and Environmental Sciences, University of Pavia (since November 2015).
- Scientific Director of the Summer School: "*Advances in Species distribution modeling in ecological studies and conservation*" (Pavia, 2011).
- President of CISO – Centro italiano studi ornitologici – Italian Ornithological Research Centre (since September 2015).
- Member of the Academic Board of the PhD School in Applied Ecology and Geobotany, University of Pavia.
- Member of the Academic Board of the PhD School in Earth and Environmental Sciences, University of Pavia.

Teaching Activities

Didactic activities are carried out at the University of Pavia. In the Academic year 2015-2016 Giuseppe Bogliani is the holder of the following courses: 1) Ethology (BSc course, 6 credits), 2) Applied Zoology and Ethology (MSc course, 6 credits).

Research activities

Giuseppe Bogliani operates in the Scientific sector BIO-05 (Zoology).

He has carried out research on the following topics.

Basic research

- Intraspecific variations in animal social behavior.
- Reproductive biology of colonial waterbirds.
- Nest predation in birds.
- Effects of landscape fragmentation on populations and communities.
- Ecology of aquatic animal communities of rice paddies.

Applied Research

- Effects of EU agri-environmental measures on biodiversity.
- Development of biodiversity indicators for urban green areas.
- Application of wildlife management in populations and communities of wild birds.
- Research and development of techniques to mitigate the effects of dry rice paddies on aquatic fauna and the mosquito populations.
- Identification of priority areas for biodiversity conservation in the Po Valley in Lombardy.
- Coordination of the Working Group on Ecological Network of the Region of Lombardy.
- Environmental impact assessment of infrastructures.

The results have been published in more than 160 scientific publications and conference proceedings. A partial list of publications can be found on the website:
